Adler Kiely

Cranberry Township, PA | adler.kiely@gmail.com | linkedin.com/in/adlerkiely | adlerkiely-afk.github.io

U.S. Citizen | **40 hrs logged flight time**

Education

Kent State University — Kent, OH

B.S. Aerospace Engineering | **GPA: 4.0/4.0** — Expected May 2029

Relevant Coursework: Statics, Calculus I-III, Linear Algebra, Physics I-II (E&M), Engineering Computing (MATLAB)

Honors: President's List, President's Achievement Scholarship

Engineering Projects

Kent State University Rocket Team — Kent, OH

Payload Subsection Lead — August 2026 - Present

- Direct members of a 6-member payload subsection through design, fabrication, and integration for the 2027 L3 rocket, executing direction from the senior payload lead.
- Developing a 4U CubeSat form-factor weather station payload that measures atmospheric data using pitot tubes and other sensors, with a servo-actuated pitot deployment mechanism.

Aerostructure Member — January 2026 - August 2026

- Fabricated G10 fiberglass composite fins for a 13-ft high-power rocket, beveling leading edges to reduce pressure drag and epoxy-bonding fins to the body tube for launch and recovery loads.

High-Speed UAV — Independent Project

Sole Designer - In Development — April 2026 - Present

- Designing a high-speed airframe in SolidWorks and Fusion 360, sizing an integrated electric propulsion package across motor, ESC, propeller, and battery.
- Setting up CFD in ANSYS Fluent on the airframe geometry to estimate drag before committing to a build configuration.
- Prototyping 3D-printed fit-check parts and correcting the model from caliper measurements across successive revisions.

Experience

Equinox Engineering Ltd. — Canonsburg, PA

Engineering Undergraduate Student — June 2026 - Present

- Reviewed finalized 2D/3D engineering drawings to study company modeling methodology, drafting standards, and geometric dimensioning and tolerancing (GD&T) conventions.
- Gain exposure to engineering, procurement, and construction management (EPCM) workflows across facility design and cross-disciplinary coordination on oil and gas and energy projects.
- Taught myself Microsoft Power BI and built dashboards visualizing engineering project metrics to support data-driven reporting.

Kent State University — Kent, OH

Academic Tutor - Calculus I & II, Physics I — April 2026 - Present

- Selected based on 4.0 GPA to tutor calculus and calculus-based physics, breaking analytical problems into approachable steps for peers.

Technical Skills

CAD and Analysis: SolidWorks, Fusion 360, Onshape, ANSYS CFD (working knowledge), FEA (working knowledge)

Programming and Data: MATLAB, Java, Python (working knowledge), Power BI, Excel

Fabrication and Prototyping: G10 composite fabrication, epoxy bonding, 3D printing, mechanical assembly, Arduino

Flight Systems: Airfoil selection, propulsion and battery sizing

Aviation: Single-engine land; airspace classes, sectional charts, weather products, preflight planning

Leadership & Affiliations

AIAA, Kent State Student Branch: Advocacy Officer (2026 - Present)

Lockheed Martin Ethics Case Competition Team, Kent State: Member (2026)

Tripoli Rocketry Association: Member
